

Airtificial Ear Couple kit MPA 711

MPA 711 is a ear simulator kit for making earphones acoustic measurements, which is coupled to the human ear by ear tip, or ear rubber.

MPA 711 is a polarized ear simulator according to IEC 60318-4 (60711), including EC 711 pressure sensor ear coupler , MA 801 preamplifier.

MPA 711 + PM 0723 + AM 580 are a classical configuration for bluetooth earphone test.

Standard

- Complies with IEC 60318-4:2010 Ed.1.0
- Complies with ITU-T P.57(08/96)
- Complies with SJ/T 10659-1995

Specification

Frequency Response	20Hz – 16kHz \pm 1dB
Power	ICP/IEPE
Connector	BNC

Typical, Reference point 500Hz
